

```

#include<stdio.h>
#include<conio.h>
int main()
{
    int num1, num2, num3;
    printf("Enter the value of num1=");
    scanf("%d", &num1);
    printf("\nEnter the value of num2=");
    scanf("%d", &num2);
    printf("\nEnter the value of num3=");
    scanf("%d", &num3);
    if(num1>num2&&num1>num3)
    {
        printf("num1 is largest");
    }
    else if (num2>num1&&num2>num3)
    {
        printf("num2 is largest");
    }
    else
    {
        printf("num3 is largest");
    }
    getch();
    return 0;
}

```
